

Jordan Amaya

Game developer with 2 years of experience specializing in the Unity and C# ecosystem. My work focuses on performance and architecture: clean code, optimization, memory management, rendering, physics, and applied mathematics. My design background complements my technical perspective, helping me understand development needs and build modular, stable, configurable architectures that make editing, tuning, and polishing the game easier.

EXPERIENCE

Unity Developer Vacaflama Studio	Jun 2024 - Present
Unity developer at Vacaflama Studio. I implemented gameplay logic, UI flows, internal editor tools, WebGL and Android release work, and reusable Unity project structure. I published El Gran Teatro del Mundo: El Videojuego and currently develop race gameplay prepared for future netcode in SUN BURN NITRO.	
VR Unity Developer Premium Cine, VR Department	Oct 2023 - May 2024
I implemented VR interactions, activity logic, asset integration and localization-ready content for four VIRION educational applications, a pan-European Erasmus+ project focused on immersive STEM learning.	

EDUCATION

Master's Degree in Computer Graphics, Games and Virtual Reality Universidad Rey Juan Carlos	Oct 2025 - Jun 2026
Bachelor's Degree in Game Design and Development Universidad Rey Juan Carlos	Sep 2019 - May 2024

SKILLS

Unity	VR	C#	Computer Graphics
3D Math	Physics	UI/UX	Testing
WebGL	Android		

LANGUAGES

Spanish native · English C1

PROJECTS

El Gran Teatro del Mundo: El Videojuego Unity · Vacaflama Studio / Compañía Nacional de Teatro Clásico I implemented the Unity gameplay code, screen flow, save flow, dialogue logic, puzzle interactions, UI integration, internal tools and WebGL/Android release preparation.	2024	VIRION Project Unity VR · Premium Cine, VR Department I implemented Unity VR interactions, activity logic, educational asset integration, and localization-ready text structures for the STEM modules.	2024
Mechanocult Unity · Universidad Rey Juan Carlos / typtyp studios I designed the gameplay architecture for cards, spells and status effects, separated typing state from presentation, and implemented netcode-facing duel logic and persistence.	2026	SUN BURN NITRO Unity · Vacaflama I defined technical direction, prototyped race gameplay, implemented foundations for character abilities and competitive interactions, and prepared the project for future netcode constraints.	2027
